## Kubernetes version 1.29 change log

Last updated 2024-08-15

View information about version changes for major, minor, and patch updates that are available for your IBM Cloud® Kubernetes Service clusters that run version 1.29. Changes include updates to Kubernetes and IBM Cloud Provider components.

### Overview

In clusters that run version 1.23 or earlier, the IBM Cloud provider version enables Kubernetes APIs and features that are beta. Most new beta features are disabled by default. Kubernetes alpha features, which are subject to change, are disabled in all versions. For more information, see [new beta features](#) and [alpha features](#) in the [Kubernetes documentation](#) and the [Feature gate](#) for each version.

**Tip:** For more information about major, minor, and patch versions and preparation actions between minor versions, see [Kubernetes versions](#).

Check the [Security Bulletins on IBM Cloud Cloud](#) for security vulnerabilities that affect IBM Cloud Kubernetes Service. You can filter the results to view only the [Kubernetes Cluster security bulletins](#) that are relevant to IBM Cloud Kubernetes Service. Change log entries that address other security vulnerabilities don't also refer to an IBM security bulletin, are for vulnerabilities that are not known to affect IBM Cloud Kubernetes Service in normal usage. If you run privileged containers, run commands on the workers, or execute untrusted code, these may work to an attack.

**Note:** Some change logs are for worker node fix packs, and apply only to worker nodes. You must update [node.js](#) to ensure security compliance for your worker nodes. These worker node fix packs can be at a higher version than the master because some build fix packs are specific to worker nodes. Other change logs are for master fix packs, and apply only to the cluster master. Master fix packs might not be automatically applied. You can choose to [apply them manually](#). For more information about patch types, see [update types](#).

### Revision 1.29 change log

Review the version 1.29 change log.

#### Change log for worker node fix pack 1.29\_7\_1555, released 12 August 2024

The following table shows the changes that are in the worker node fix pack 1.29\_7\_1555. Worker node patch updates can be applied by updating, re-rolling (in-classic infrastructure), or replacing (in VPC infrastructure) the worker node.

| Component             | Previous          | Current           | Description  |
|-----------------------|-------------------|-------------------|--|
| Ubuntu 20.04 packages | 5.4.0-190-generic | 5.4.0-192-generic | Worker node kernel & package updates for <a href="#">CVE-2023-48655</a> , <a href="#">CVE-2023-48656</a> , <a href="#">CVE-2023-48657</a> , <a href="#">CVE-2023-48658</a> , <a href="#">CVE-2023-48659</a> , <a href="#">CVE-2023-48660</a> , <a href="#">CVE-2023-48661</a> , <a href="#">CVE-2023-48662</a> , <a
